

SPARQ H2

Steaming hot water in an instant.

With almost 30 years in the water filtration industry, Puretec remains a family owned, family run company with an unrivalled reputation for quality, innovation and reliability.

Perfection

We know uncompromised quality and consistency along with innovation and technology is of utmost importance with water filtration – that’s how we’ve ensured Puretec water is consistent and exact. At Puretec, perfection is only just good enough.

Commitment

Our philosophy of genuine commitment to quality, value and customer service ensures that your Puretec experience will be enjoyable and world class. Puretec manufactures to impeccable standards and we back this is up with warranties that are the benchmark in the industry.

Established

Puretec has been manufacturing and designing water filtration products since the 1980’s and every year we invest in ongoing research and development. Our far reaching experience has ensured that the Puretec product range is broad and leads the market.

Customer Service

The Puretec team is passionate about perfecting water. Call us with questions, as we are here to help. Solutions are never far away.

We trust you find your Puretec experience, enjoyable and satisfying.

Enjoy filtered steaming hot
or ambient drinking water
in your home or office.

Instant, steaming hot water on tap

Steaming hot water, with an adjustable temperature. With the SPARQ H2 it can be tea-time anytime providing instant, filtered and steaming hot water. Ready whenever you are.

Worry-free reliability

Unlike other unnecessarily complicated systems, the SPARQ H2 uses simple, efficient and reliable technology to deliver instant, steaming hot water. So you won't have to worry about expensive maintenance costs.

Incorporates the most advanced Ultra Z Filtration Technology

The SPARQ H2 uses Ultra Z Filtration Technology, providing you clean, beautiful tasting drinking water, free from cysts, odours and chemicals.

*Enjoy the convenience
of instant steaming
hot water, right at your
fingertips.*

The SPARQ H2 gives you the convenience of steaming hot or ambient filtered water, instantly.

Save precious time.

Unlike a kettle, the SPARQ H2 won't waste your time. It won't take forever to boil. No more waiting, or walking away and forgetting you had the kettle on. Just steaming hot water, with an adjustable temperature, that's ready whenever you are.

Enjoy quicker cooking.

Whether you're making a cuppa, boiling pasta or cooking veggies, the SPARQ H2 will help you get dinner on the table fast. Simply fill the pot with steaming hot water, and you'll be cooking before a kettle would even be boiled.

Improve the taste of your tea.

Have you noticed how even the finest of teas can have a bitter taste? Ask any tea connoisseur, and they'll tell you, 'it's the water.' Minerals and additives in tap water can add a metallic flavour on your tea. The SPARQ H2 filters your water for delicious tea and coffee made with clear, fresh, odour-free water.

Increase your water intake.

With fresh ambient drinking water available on demand, you can enjoy beautiful tasting filtered water all day. You'll no longer have to put up with the smell and lingering bad taste of tap water. And if you're on the go, just fill up your reusable bottle for delicious clean water, no matter where you are.

The heart of Puretec's SPARQ H2

Adjustable Temperature

Adjust your instant steaming hot water from 60° to 98°C (temperature in tank) so you can choose the most appropriate level of heat for your needs.

The SPARQ H2 incorporates the most advanced Ultra Z Filtration Technology. It filters out sediment, chemicals, taste & odour, bacteria and cysts down to 0.1 of a Micron. It also removes 99% of Cryptosporidium and Giardia cysts, which are known to cause nasty intestinal illnesses.

Heating the water

The SPARQ H2 holds an ample 2.6L of water in a removable stainless steel tank. The hydrodynamically designed chamber allows the hot water to flow to the top of the tank which prevents mixing already heated water with incoming ambient water. When you need instant steaming hot water, the system draws from the already heated water to conserve energy use.

Ambient Drinking Water

The SPARQ H2 gives you clear, pure ambient drinking water straight from the tap. The system inhibits scale and lime build-up which reduces lead levels in the water. So you can enjoy safe, delicious, refreshing water with no nasty bacteria or chemicals. And no nasty metallic aftertaste.

The SPARQ H2 is stylish,
convenient, safe and reliable.

Convenient

Whether you're preparing hot beverages, cooking soups, pasta or rice, or cleaning grease off the stove top, with instant steaming hot water you can spend less time in the kitchen.

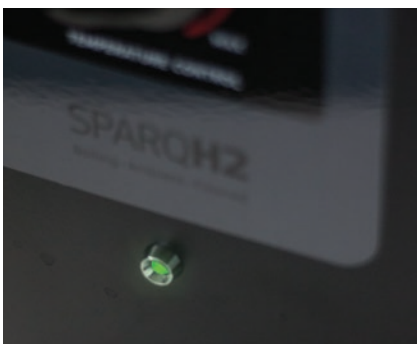

Sleek Design

Sleek lines and elegant styling means the SPARQ H2 will be a stylish addition to any home or office kitchen.

Safe to Use

A safety lock on the hot water tap prevents scalding. And built-in protections keep the system and users safe from unexpected power and water supply interruptions.

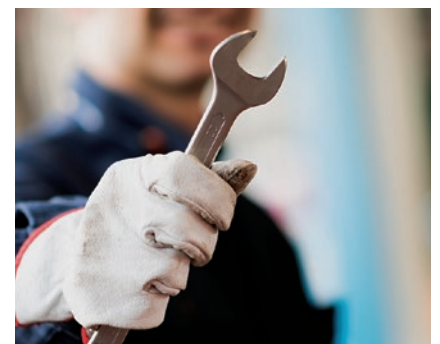

Energy Efficient

The standby power usage is less than a 40W light bulb, and the insulated hot water tank reduces heating time and conserves water.

Compact Undersink System

The ample 2.6L tank is concealed in a compact under sink system, saving you precious cupboard space. And it's built to last with a solid metal casing that's almost indestructible.

Quick Installation

The SPARQ H2 can be installed wherever there is mains water access. The initial set-up requires a visit by a qualified plumber, who should have the unit installed and ready to use in under an hour.

SPARQ H2 Product Specification

SPARQ H2 Product Specification

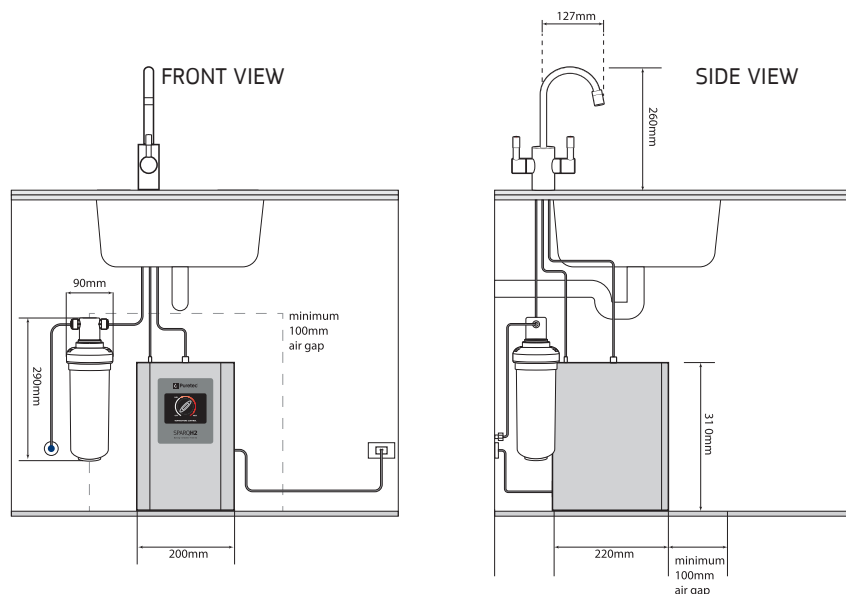

Model No:	SPARQ H2
Micron Rating:	0.1 Micron using Ultra Z Filtration Technology
Hot Water Capacity:	60 Cups/Hour
Water Pressure:	172 to 500 kPa
Hot Water Temperature:	60° to 98°C (temperature in tank)
Power Requirements:	10 amp
Rated Power:	780 W
Appliance Dimensions:	310 (h) x 200 (w) x 220 (d) mm
Tap Dimensions:	127 (h) x 260 (w) mm
Warranty:	2 Year [^]

[^]2 Year warranty is 1 year parts and labour, plus 1 year parts only. Excludes cartridges.

Installation Requirements

Water Connection:	Mains in (350 kPa max) – ¼” Push Fit/Faucet to 6mm Push Fit
Electricity:	10 amp – Earth Leakage Protected
Max. Recommended Inlet Pressure:	350 kPa
Required hole for the tap:	35 mm
Power requirements:	10 amp
Ideal undersink dimension:	520 (h) x 750 (w) x 660 (d) mm
Weight:	Unit only – 6 Kg

Dimensions

A Ø35mm hole required for faucet.

Note: All dimensions are expressed in millimeters.

Bring home the
convenience of
steaming hot
water, in an instant.
