

GENERAL INFO

WASHABLE SCREEN CARTRIDGES

Washable Screen Sediment Removal Cartridges

The Puretec WS Series, a washable screen cartridge, is ideal for the removal of high sediment and dirt, at a high flow rate. With a coarse filtration rating they are typically used for pump protection, aquaculture, etc. These cartridges are not recommended as a final filter for drinking water.

External screen can be removed by unscrewing the end cap off the centre core cage, making this a long life filter that can be washed many times.

SPECIFICATIONS

	Model	Micron Rating	Flow (Lpm)	Min/Max Temperature
5"	WS605	60	30	0 - 60°C
	WS2505	250	50	0 - 60°C
10"	WS601	60	60	0 - 60°C
	WS2501	250	80	0 - 60°C

FEATURES & BENEFITS

- Designed for removal of high sediment and dirt at a high flow rate.
- Recommended for first stage filtration.
- Polypropylene body, Polyethersulfone mesh screen for longevity.
- Unscrews for easy cleaning and reuse.
- Available in 60 and 250 microns.
