

GENERAL INFO

UV SLEEVE CLEANER (750 ML)

Reduces Calcium & Magnesium (lime, scale), grime build-up and iron staining.

The Puretec SC1000 UV Sleeve cleaner is designed to help reduce scale build-up and staining on UV Sleeves. Supplied in a convenient spray bottle (750 ml) to make cleaning the glass sleeves on your UV system easier.

DIRECTIONS FOR CLEANING UV SLEEVE

Wearing protective clothing remove the UV sleeve from the chamber according to the manufacturer's instructions. Wet the surface to be cleaned before applying the scale cleaner. Spray the sleeve with a generous coating of scale cleaner, making sure liquid is sprayed away from eyes and bare skin. Use a soft wet cloth to clean the sleeve. Once the sleeve is free from scale, rinse and dry thoroughly with a clean cloth.

Never touch the quartz (glass) surface with bare hands as marks or fingerprints may interfere with UV transmission.

FEATURES & BENEFITS

- Ready to use trigger bottle, no diluting needed.
- Designed for cleaning UV sleeves. Can also be used on porcelain, glass & stainless steel.
- Cleans, protects and shines surfaces.

Warning: Causes severe skin irritation and eye damage. CONTAINS: ACETIC ACID 1-10% W/W

DIRECTIONS FOR GENERAL USE

Wet the surface to be cleaned before applying the scale cleaner. Wearing protective clothing, spray surface area with a generous coating of scale cleaner, making sure liquid is sprayed away from eyes and bare skin. For best results allow scale cleaner to soak into build-up (for iron stains it is recommended to leave the scale cleaner product to soak on the surface for up to 3 days). Once the build-up has loosened, vigorously wipe the surface area with a wet cloth. When the surface is free from build-up, rinse and dry thoroughly.

DIRECTIONS FOR GENERAL USE (CONT.)

SAFETY DIRECTIONS: Read label before use. Do not breathe fume, gas, mist, vapors or spray. Wash hands, face and all exposed skin thoroughly after handling. Wear protective clothing, gloves, eye/face protection and suitable respirator mask.

FIRST AID: If poisoning occurs, contact a doctor or Poisons Information Centre (**AU 131 126, NZ 0800 764 766**). If medical advice is needed, have product container at hand.

INHALATION: Remove victim from exposure. Remove contaminated clothing and loosen remaining clothing. Allow patient to assume most comfortable position. Keep at rest until fully recovered. Seek medical advice if effects persist.

SKIN CONTACT: If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. If swelling, redness, blistering or irritation occurs seek medical assistance. For skin burns or skin irritation, cover with a clean, dry dressing until medical help is available.

EYE CONTACT: Immediately irrigate with copious quantities of water for 15 minutes. Eyelids to be held open. Remove clothing if contaminated and wash skin. Urgently seek medical assistance. Transport to hospital or medical centre.

INGESTION: Rinse mouth with water. If swallowed, do NOT induce vomiting. Give a glass of water to drink. Never give anything by the mouth to an unconscious patient. If vomiting occurs give further water. Seek medical advice.

Not classified as Dangerous Goods by the criteria of the "Australian Code for the Transport of Dangerous Goods by Road & Rail" and the "New Zealand NZS5433: Transport of Dangerous Goods on Land".
